

Beurer air purifiers for an optimum indoor environment

Ulm, 17 August 2021– Humans spend an average of 90 percent of their lives indoors. The concentration of pollutants and allergens is often two to five times higher inside than outside. A healthy indoor environment plays an important role, especially in the current times – and not just for allergy sufferers. Beurer offers high-quality air purifiers for all room sizes and needs.

The Beurer LR 210, LR 310 and LR 500 Air purifiers feature three-layered filter systems including a highly effective HEPA H13 filter. With 99.95% filter performance, the high-performance, fine mesh filters reliably remove fine/domestic dust, animal hair, pollen, odours, harmful gases as well as various viruses and bacteria from the air*. So you can breathe easily again at home, in the office or in the classroom.

LR 210 & LR 310: Highly effective against fine dust and pollen

LR 210 and LR 310 filter almost everything that could be harmful to health out of the air. In addition to the three-layered filter system, an optional ion function (LR 210) or UV light function (LR 310) can be activated for additional air cleaning. LR 210 is suitable for rooms up to 26 m², the LR 310 for rooms up to 54 m². Both devices have three fan levels, a timer function (2, 4 or 8 h), a filter change indicator and an automatic switch-off. The LR 310 automatically adapts the fan speed to the ambient air quality.

LR 330: The convenient 2-in-1 model with air humidification

Air cleaning and air humidification in one – the LR 330 Air purifier with its three-layered filter system comprising a prefilter, activated carbon filter and EPA filter with 85% filter performance does not just ensure clean air, it also humidifies it using cold evaporation. You can set the desired humidity (40-80%) to improve your well-being in your home. With a current ambient air humidity indicator, three fan levels, timer function (1-12 h), removable water tank, filter change indicator and automatic switch-off, the device has numerous useful features.

*Tests show: The three-layered filter system with HEPA H13 filter filters out up to 95% of particles $\geq 0.02 \mu\text{m}$ in size (IUTA test in April 2020 according to DIN 71460-1). 99.95% of particles $\geq 0.3 \mu\text{m}$ in size are eliminated. For comparison: According to the German Federal Centre for Health Education, viruses are generally 0.02-0.3 μm in size.

LR 500: The top model with app control

With the LR 500 and the free "beurer FreshHome" app, it is easy to conveniently control and monitor air quality when at home or out. Alternatively, the device can also be operated using the Magic LED display with sensor touch buttons. This displays the room temperature and humidity, too. In addition to the excellent filter performance, viruses, bacteria and germs are removed by activating an optional UV light function. A sensor detects even the smallest fine dust particles up to 2.5 microns in size and automatically adjusts the fan speed to the particle level. A colour indicator on the device displays the air quality in real time. The LR 500 has four fan levels, a turbo mode and a timer function (1-24 h). The product is suitable for rooms up to 106 m² in size. In super-quiet night mode with dimmed control panel, it improves air quality without disturbing sleep. What's more, individual air cleaning schedules can be set in the app for each day of the week.

LR 220: New design gem in the range

With its modern, round design, the LR 220 blends in perfectly to any home. Thanks to the three-layered filter system with HEPA H13 filter, pollen, fine dust etc. don't stand a chance! The product has two fan levels, a timer function (2, 4 or 8 h) and a high-performance turbo mode for particularly fast air cleaning. Thanks to the night mode, the device can also be used in the bedroom in ultra-quiet mode and with a dimmed control panel. The LR 220 is suitable for rooms up to 37 m² in size and is suitable for versatile use throughout the whole house or in the office. To ensure hygiene, the air purifier has a filter change indicator that informs the user when a filter replacement is recommended.

About Beurer

Beurer was founded in 1919 in Ulm and is synonymous with health and well-being. Today, the long-established company leads the way in several product fields in this segment; the company is the market leader in Europe in the area of flexible heating and a market leader in Germany for blood pressure monitors and massage products. Beurer is also one of the leading suppliers of personal bathroom scales in Europe. This portfolio, which is under constant development in all areas, offers products for use in the home. It includes: personal bathroom scales, kitchen scales, luggage scales, air purifiers, air dehumidifiers, air washers, thermo hygrometers, aroma diffusers, blood pressure monitors, blood glucose monitors, mobile ECG devices, hearing amplifiers, pulse oximeters, nebulisers, clinical thermometers, a sleep sensor, wake up lights, a snore stopper, daylight therapy lamps, infrared lamps, TENS/EMS devices, massage products (foot massage, Shiatsu massage, massage chairs, massage cushions, fascia massage, leg compression massager), relaxation

aids, hair removal devices (classic, IPL, laser), FaceCare and HairCare products, a cellulite releaZer, cosmetics mirrors, manicure/pedicure sets, a BabyCare line, ovulation thermometers, activity sensors and heart rate monitors. USB ports and *Bluetooth*[®] make it possible for a growing number of Connect products to be linked to the expanding Beurer app world and/or software. The family-run company operates a global distribution network in more than 100 countries and currently has a workforce of around 1,000 people. You can find more information at www.beurer.com.
