

New massage guns for targeted and effective muscle regeneration

Ulm, 26 January 2022 – Wave goodbye to muscle pain! Targeted trigger point massage can regenerate tired parts of the body and effectively relieve muscle tension. The Beurer PhysioLine offers precisely tailored products that provide effective support for muscle tissue strengthening and regeneration. The range is now being expanded with two new massage guns, the MG 99 compact and the MG 185, and offers athletes, above all, the chance for some soothing downtime after training. What is more, the devices can also provide relief for people suffering from tension in their everyday life, for example as a result of office work.

Both muscle massagers can be used in a variety of ways on thighs, calves, shoulders, arms and different areas of the back (excluding the spine). Targeted trigger point application activates and regenerates the massaged muscles.

MG 99 compact: Lightweight, handy and practical for on the go

The MG 99 compact is ideal for use at home, in the gym or on the go. Thanks to its ergonomic design, it is very light and quiet, can be used anywhere in battery mode, and fits perfectly into any sports bag. With its four different attachments (ball head, spiral head, U-shaped head

and flat head) for individual use, as well as five intensity levels, the muscle massager quickly soothes and relaxes tired muscle groups. The LEDs on the device indicate the intensity level and the battery level. The massage gun stands out thanks to its unmistakable design and modern petrol metallic colour. At its lowest intensity level, the device provides up to four hours of cordless use thanks to its lithium-ion battery. A full charge takes approximately 3.5 hours.

MG 185: A powerhouse with 9 intensity levels and 3 massage modes

The new MG 185 fits perfectly in the hand thanks to its optimal weight distribution and slim, modern design. It has five different massage attachments and a total of nine intensity levels for the powerful and targeted massage of different muscle areas. There are also three predefined massage programmes to choose from – for perfect use on the entire body. The intensity levels and massage programmes can be easily controlled to suit your personal needs using the touch display. The battery level is also displayed in colour on the display. Like the MG 99 compact, the MG 185 comes with the four attachments: ball head, spiral head, U-shaped head and flat head. It also comes with the air cushion head, which is perfect for use on sensitive tissue, such as in the neck area.

The MG 185 stands out thanks its classic black design with attractive colour accents. In intensity level 1, the powerful lithium-ion battery boasts an exceptional battery life with an operating time of up to 5.5 hours, enough for over 20 use cycles. Charging time is approximately three hours. A practical travel case for storage and easy transport is included.

The MG 99 compact and MG 185 each have an automatic switch-off function, which ends the programme automatically after the recommended application time of ten minutes.

Technical data:

	Dimensions	Weight	Intensity in rpm	Attachments and intensity levels
MG 99 compact	approx. 16.4 x 5.8 x 18.4 cm without attachments	approx. 620 g without attachment s/adapter	1800 - 3000	4 attachments 5 intensity levels
MG 185	approx. 26 x 6.5 x 15.5 cm without attachments	approx. 1075 g without attachment s/adapter	1200 - 3000	5 attachments 9 intensity levels 3 massage modes

About Beurer

Beurer was founded in 1919 in Ulm and is synonymous with health and well-being. Today, the long-established company leads the way in several product fields in this segment; the company is the market leader in Europe in the area of flexible heating and a market leader in Germany for blood pressure monitors and massage products. Beurer is also one of the leading suppliers of personal bathroom scales in Europe. This portfolio is constantly being developed further in all areas and offers products for use at home. It includes personal bathroom scales, kitchen scales, luggage scales, air purifiers, air dehumidifiers, air washers, thermo hygrometers, aroma diffusers, blood pressure monitors, blood glucose monitors, mobile ECG devices, hearing amplifiers, pulse oximeters, nebulisers, clinical thermometers, a sleep sensor, wake up lights, a snore stopper, daylight therapy lamps, infrared lamps, TENS/EMS devices, massage products (foot massage, Shiatsu massage, massage chairs, massage cushions, fascia massage, leg compression massagers), relaxation aids, hair removal devices (classic, IPL, laser), FaceCare and HairCare products, a cellulite releaZer, cosmetics mirrors, manicure/pedicure sets, a BabyCare line, ovulation thermometers, activity sensors, an activity watch and heart rate monitors. USB ports and *Bluetooth*[®] enable an increasing number of Connect products to connect to the growing Beurer app world and/or software. The family-run company operates a global distribution network in more than 100 countries and currently has a workforce of around 900. You can find more information at www.beurer.com.
