Massage to go, Shiatsu massage and massage range

Variety for individuality
Beurer has been the market leader in the health and well-being sector since 1919. In addition to our cornerstones of flexible heating, blood pressure monitors and scales, Shiatsu massage forms one of our key areas. We have cleverly combined state-of-the-art technology with treatment techniques from Asia. The result: products that provide a soothing massage that pleasantly ease and relax body and mind.

Shiatsu massage originates from Asia. It is a soothing and relaxing pressure massage using fingers, thumbs or palms. The Shiatsu massage products imitate this movement. Depending upon the intensity and pressure, this type of massage can also act deep in the tissues and is ideally suited for relaxing the muscles and relieving any tension.

State-of-the-art technology, precision and sophisticated motion sequences create a natural and soothing massage. Highly contemporary technology that can’t be seen, but can certainly be felt!

We want you to feel great.

**Noticeable innovation with natural effects**

**Treatment points:** Targeted application directly on the painful areas ensures a long-lasting sense of well-being, relaxation and loosening of the muscles.

**Type of massage:** The Beurer massage range offers the right product for every treatment area with tailored functionality.

1. **Shiatsu back massage**
   This art of massage originating from Asia fuses the terms SHI = finger and ATSU = pressure. With flowing, circular movements, this “finger pressure massage” guarantees holistic relaxation.

2. **Shiatsu neck massage**
   This Asian “finger pressure massage” ensures holistic relaxation through flowing, circular movements in the neck area.

3. **3D Shiatsu massage**
   The three-dimensional, see-sawing movement along the spine helps to create a feeling of penetrating relaxation across the whole back.

4. **Roll massage**
   The soft rolling massage along the spine combats muscular tension and offers soothing relaxation across the whole back.

5. **Vibration massage**
   With soft waves, vibration massage loosens the muscles. For an all-round warm and comforting feeling of relaxation.

6. **Spot massage**
   With this form of massage, you alone determine the precise application point of the massage by simply pressing a button. Soothing relaxation exactly where you need it.

7. **Tapping massage**
   With powerful and rhythmic tapping movements, this massage penetrates the deeper layers of muscle to help create a feeling of deep relaxation.

8. **Kneading massage**
   A targeted and intensive kneading movement helps this massage to combat tension and promote circulation in the muscle and skin layers.

9. **Air pressure massage**
   Gentle to intense air pressure in the chambers provided helps to create a soothing pressure massage for targeted relaxation of the legs, calves and feet.

10. **Swing massage**
    The dynamic swinging movements along the spine stimulate circulation and boost metabolism.
MG 520 Shiatsu massage cushion

- Soothing Shiatsu massage
- Works cordlessly so you can use it anytime and anywhere
- For relaxation of the muscles and regeneration after exercise
- Versatile application for the shoulders, neck, back and legs
- High-performance lithium-ion battery

Compression leg therapy

FM 150 compression leg therapy

- Revitalising compression massage
- Improves the blood circulation through restoration of the vein function
- Promotes circulation and relieves tired, heavy legs
- Relieves tension
- Massage for lower legs

- Air pressure massage with inflating and deflating air cushions
- Continuously adjustable massage intensity
- Alternate inflation of the leg cuffs
- With safety STOP button
- With deflation function – for emptying the air cushions quickly

Effective treatment for healthy veins

The FM 150 compression leg therapy from Beurer revitalises tired, heavy legs with an effective pressure massage. Inflating and deflating air cushions are continuously adjustable for personal wellbeing. When used on both sides, the leg cuffs are inflated and deflated again alternately by air pressure massage.

The application can be controlled individually with the comfortable control unit. The timer function ensures optimum application time and effect. Thanks to the hook-and-loop fasteners, an optimum fit is guaranteed.
