CELLULITE
MASSAGE
Reduces cellulite –
clinically tested*

cellulite releaZer®

Many women would like to have smooth thighs and a firm bottom without the unpopular dimples caused by cellulite. Now there's finally **an effective solution to use at home!**

What causes cellulite? Connective tissue is extremely flexible. Its collagen and elastic fibre supports are very flexible, so that they can give way well during pregnancy for example. In men, the fibres lying one above the other in a kind of net are more firmly connected to each other, meaning that there's less room for manoeuvre.

The **cellulite releaZer** from Beurer really works! In addition to loosening, the vibration technology **tautens the deep tissue.**

It also encourages and accelerates the **breakdown of fat molecules** in the fat cells. Cellulite is broken down exactly where it forms. Annoying dimples are reduced.

Fat cells are merciless – they exploit the flexibility of connective tissue in women and simply push themselves in between the gaps, resulting in unsightly dimples and bulges.

Cellulite is persistent: neither creams nor diets help in the long run, because they do not fight the real cause.

Far-reaching effect

Get the power

The **nub structure** enhances the effect. Targeted massage increases **microcirculation in the tissue** and promotes and accelerates the **breakdown of fat molecules.**
