Now  
breathe  
in deep

HealthyAmbientAir  
initiative

With your head  
in the clouds and your  
feet on the ground.

Breathe deeply  
even at home.

**Pure air in your home**

People spend the majority of their time indoors. A healthy indoor environment is key to our feeling of well-being. Beurer's comprehensive range of air purifiers, air washers, air humidifiers, weather stations and aroma diffusers allow you to make noticeable improvements to your indoor environment and your well-being.

maremed®

MK 500 Sea air simulator

Sea air  
at home

Precious minerals and trace elements clear the airways

LR 500 Air purifier

Clean air

at any time with the three-layer filter system and the beurer FreshHome app.

HM 55 Thermo hygrometer

Optimum control

round-the-clock with the beurer FreshRoom app.

LB 45 Air humidifier

A fresh indoor environment

with low-noise operation and scented air.

Filter performance of up to 99.95%

...with integrated three-layer EPA/HEPA filter system.

The beurer FreshHome app

...enables the LR 500 air purifier to be conveniently controlled when out and about.

Up to 106 m<sup>2</sup>\*

Find the right device for your room size.

Air purifier for at home

For people with allergies

...devices that provide extra cleaning using ultraviolet light or an ion function are an excellent choice.

\*NRCC-S4013-2011

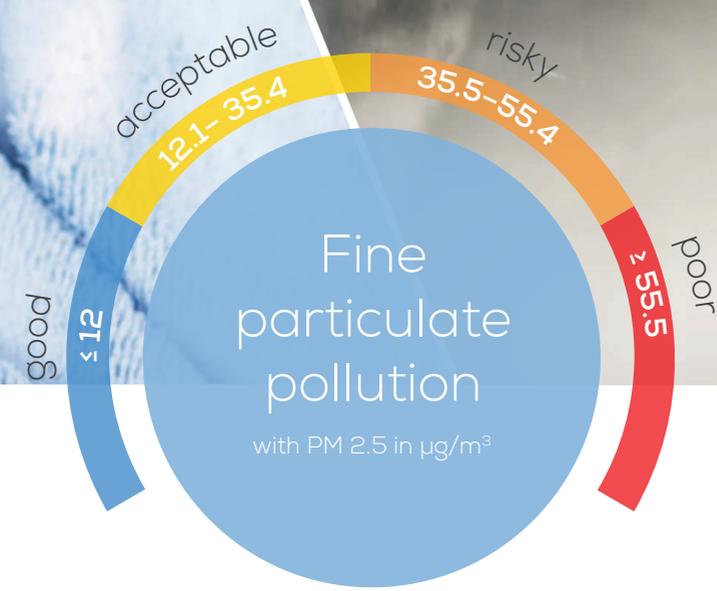

Most of us spend up to **90% of our lives indoors**. The quality of the ambient air – during the day and at night – plays a crucial role in our health and long-term well-being.

LR 500 Air purifier

Kick heavy air out of the home

LR 500 Air purifier

-  The **PM 2.5** value designates **floating particulate matter** with a diameter of less than **2.5 micrometres** (a single hair has a diameter of 70 micrometres). These can travel into the bronchi and can cause conditions in the airways and lungs, as well as heart and circulatory problems.
-  Particulate matter enters indoor spaces through **open/permeable windows**.
-  Our **air purifiers** remove fine particulate matter and ensure pure air.
-  For the sake of your health, make sure **the air in your home is always clean and healthy**.

Breathe easily with a three-layer filter system

**Pollen**  
Allergens

**House dust**  
Pet scurf  
Microscopic particles

**Bacteria**  
Mould spores

**Odours**  
Exhaust gas from cars and cigarette smoke

Pre-filter

Activated carbon filter

EPA/HEPA filter

LR 500 Air purifier

-  Indoor air can have **two to five times as many allergens and harmful substances** as the air outside.<sup>1</sup>
-  People who can't spend time outdoors during times of a peak pollen count would at least like to be able to breathe easily indoors.
-  The 3-layer **EPA/HEPA filter system** used in Beurer air purifiers removes up to **99.95% of harmful substances** from the air.

10 1) Source: WHO (World Health Organization)

## Patented technology

Ambient air is cleaned, mineralised, sterilised, ionised and humidified.

## An innovative system

The combination of smart filter technology and special sea salt creates a sea climate in the home.

## Breathe easy, like at the seaside

Precious minerals and trace elements clear the airways.

maremed®

Sea air simulator for at home

+

People who suffer from asthma, allergies and respiratory diseases often see significant benefit from spending time by the sea. The salt and mineral content in the air is particularly soothing for the airways. **The maremed® sea air simulator from Beurer perfectly replicates a natural sea climate in your home.**

maremed® Sea air simulator MK 500

maremed® Special sea salt

Mineralisation  
of the air

The ambient air is cleaned, mineralised, sterilised, ionised and humidified by the **maremed® sea air simulator**. The **smart, coordinated system** works with the addition of special natural **sea salt** produced exclusively for Beurer, which contains more than **65 trace elements**. Seawater produced using maremed® special sea salt cannot be distinguished from natural seawater.

**Just 5 steps to sea air at home**

1. The water tank is filled with maremed® special sea salt and water
2. The fan sucks air into the integrated filters for pre-cleaning to remove dirt particles, pollen, fine/house dust and animal hairs
3. A UVC lamp removes 99 % of bacteria from the air and the water
4. The circulating air is enriched with sea water minerals via the water evaporator block
5. Additional cleaning is performed in the ionisation chamber, before the mineralised air is returned into your home

maremed®

A fresh sea breeze – day and night

-  Natural humidification for healthy airways without vapour formation or salt deposits
-  Enriches the air with valuable minerals and trace elements
-  Air cleaning, mineralisation, sterilisation, ionisation and air humidification in one
-  Promotes restorative sleep and improves general well-being
-  Eliminates >99 % of bacteria, viruses and other germs using UVC rays

maremed®Sea air simulator MK 500

Ultrasound  
humidification  
technology

...Extremely quiet and  
**energy efficient** devices.

Removable  
water tank

...for **easy** filling and cleaning.

Air humidifier  
for the home

The beurer  
FreshRoom app

...for **control** and **long-term  
analysis** of humidity with the  
HM 55 thermo hygrometer.

**Ambient air being too dry can damage our health.** An air humidifier at home binds dust particles that distribute more easily in dry air, and prevents the spread of pathogens. Humidified air improves our ability to concentrate and protects our eyes and skin from drying out.

LB 45 Air humidifier

HM 55 Thermo hygrometer

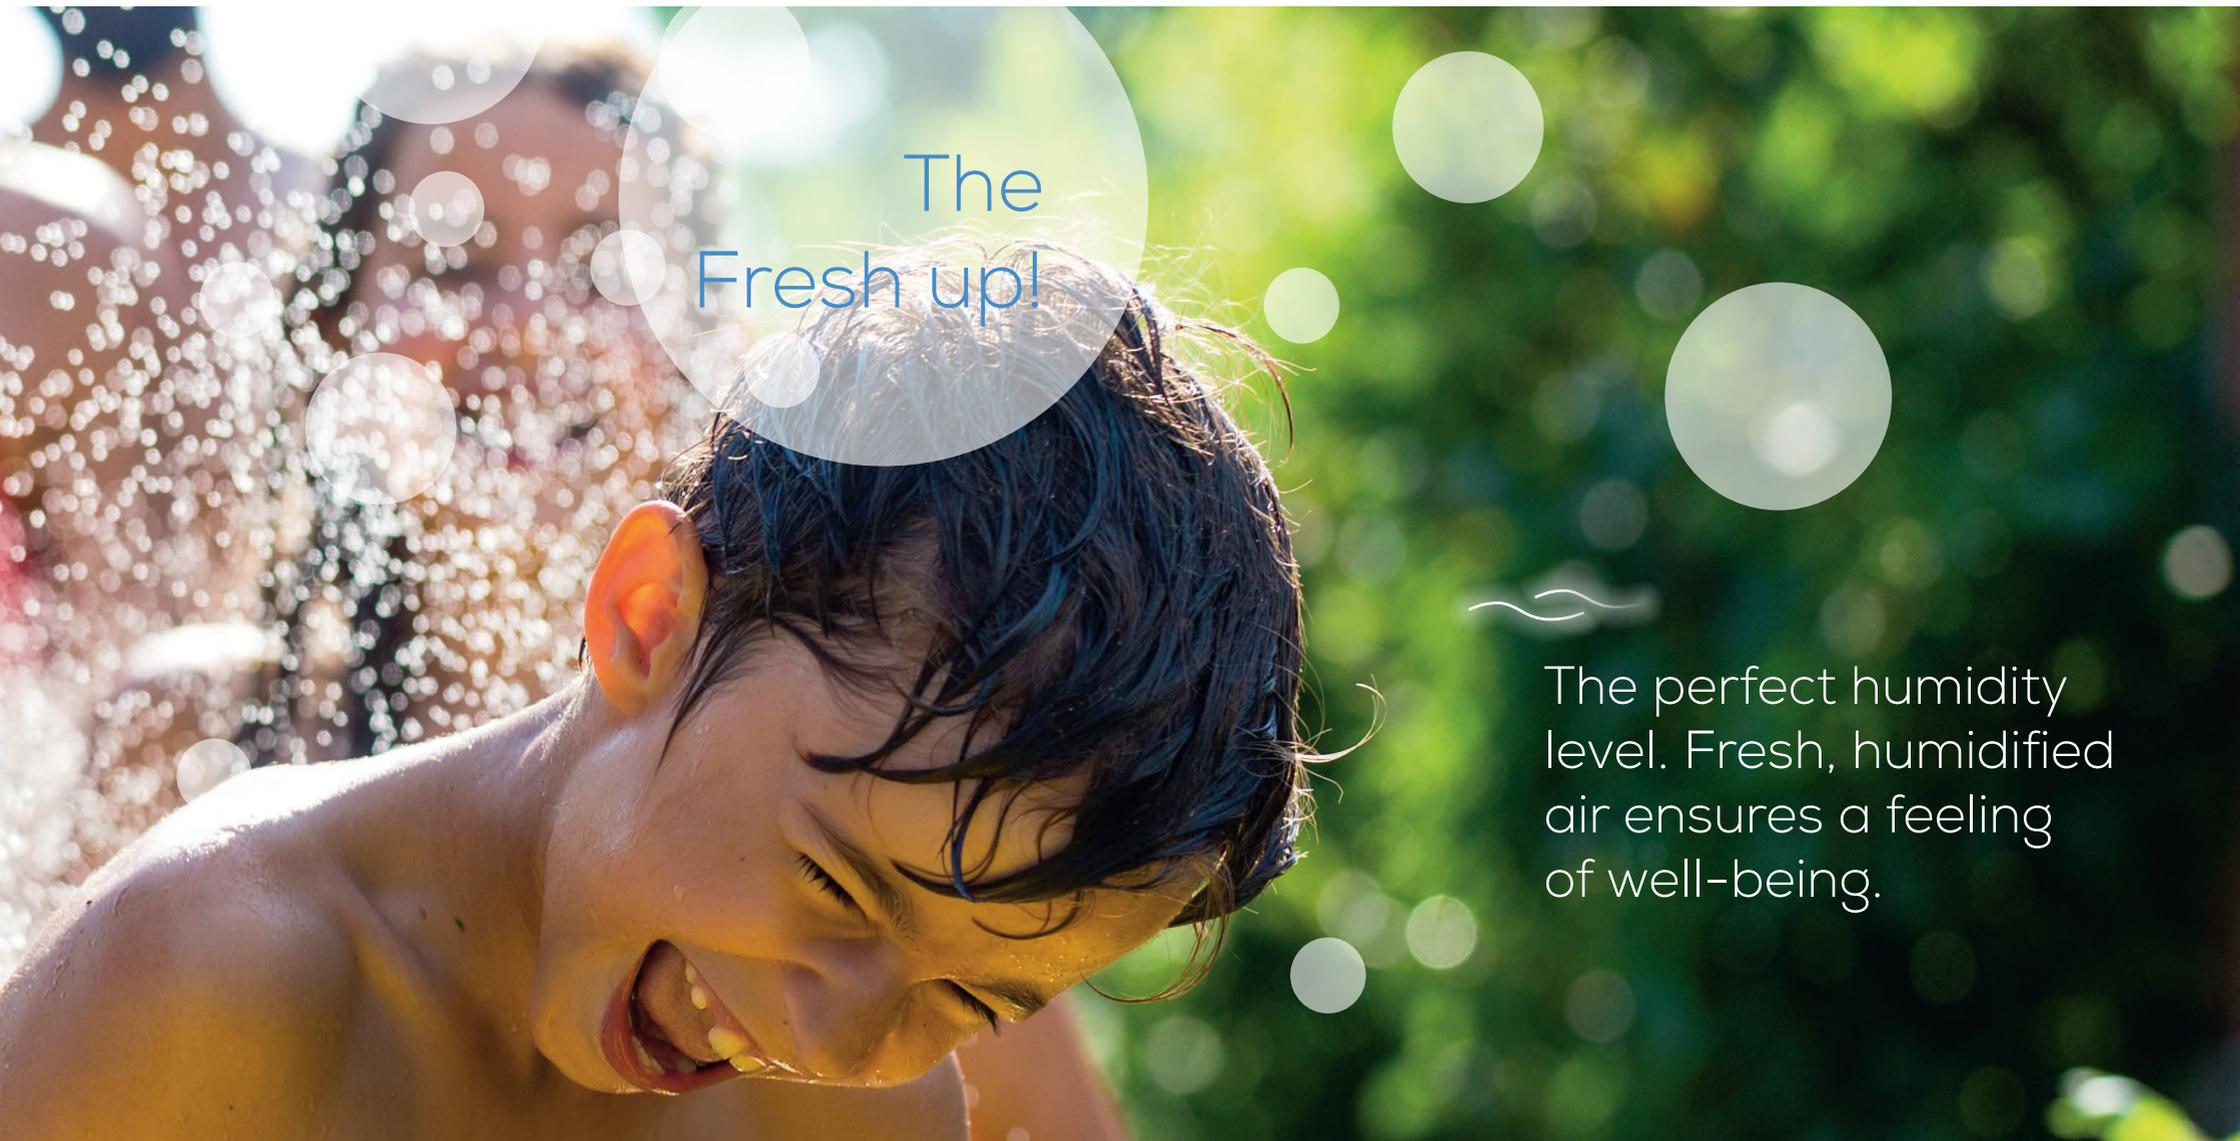

Air being insufficiently humid dries out our mucous membranes.

Humidified air binds dust particles, preventing the spread of pathogens.

A relaxed environment – fresh air.

Humidity of 40–60% is ideal.

-  Many people suffer as a result of dry air. Particularly in winter when radiators are on, in-home conditions generally do not reach the **recommended relative humidity in closed rooms of 40–60%**.
-  It would be easy to simply open a window, but **a healthy and fresh indoor environment is a complex system**.
-  With the **ultrasonic nebulisation** or **hot water evaporator technology**, Beurer air humidifiers ensure the optimum indoor environment.

# The Fresh up!

The perfect humidity level. Fresh, humidified air ensures a feeling of well-being.
