Exhale
freely.

maremed[®]

Sea air simulator

Patented technology to create a
nature-identical marine climate

maremed[®]

Breathe in.
Breathe out.

Experience the power
of the sea at home.

Breathe easy, like at the seaside

The new patented maremed® sea air simulator is Beurer's answer for bringing soothing sea air to the comfort of your own home. Breathe in deeply and feel the power of the sea soothing and relieving your airways.

Patented system

Sea air simulator
+ Special sea salt
=
maremed®

The ambient air is cleaned, mineralised, sterilised, ionised and humidified by the **maremed® sea air simulator**. The **smart, coordinated system** works with the addition of special natural **sea salt** produced exclusively for Beurer, which contains more than **65 trace elements**. Seawater produced using maremed® special sea salt cannot be distinguished from natural seawater.

Unique effect

Salt

Water

Wind

Sun

maremed® creates a nature-identical interaction between water, salt and sun, ionised seawater and the sea breeze.

The ambient air is humidified without vapour formation or salt deposits. The purity of the air is guaranteed through the elimination of up to 99 % of bacteria, viruses and other germs from the water.

How it works

Harness the power of the sea at home with a 5-in-1 system

Just 5 steps to sea air at home

1. The water tank is filled with maremed® special sea salt and water
2. The air circulates through the pre-filter where up to 70% of dirt, pollen, dust and animal hair particles are removed.
3. A UVC lamp removes up to 99 % of bacteria from the water
4. The circulating air is enriched with sea water minerals via the water evaporator block
5. Additional cleaning is performed in the ionisation chamber, before the mineralised air is returned into your home

Environmental influences

Air contamination can result in severe health problems such as allergies and disorders of the skin and respiratory system. Around 300 million people worldwide suffer from asthma, of which more than 30 million are in EU countries.

Air pollution is highest in urban areas

95%

of the world population lives in areas with polluted air

10%

of children

5%

of adults suffer from asthma.

People who suffer from asthma, allergies and respiratory diseases often see significant benefit from spending time by the sea. **The salt and mineral content in the air is particularly soothing for the airways.** With the **maremed®** sea air simulator from Beurer, you can enjoy a clean, mineralised sea environment in your own home.

Bring soothing sea air to the comfort of your home

Better air quality

Air cleaning, mineralisation, sterilisation, ionisation and air humidification

Ease of use

Device is operated via the LCD display with a sensor touch button

Powerful

6-litre water tank with automatic switch-off and a large air outlet

The sea air simulator is suitable for room sizes up to 50 m², and it has an **easy-to-clean design** that means no chemical cleaning additives are required. The **6-litre water tank** with automatic switch-off function and the large air outlet mean the maremed® can be used in all rooms.

Three humidification levels are available, while the digital touch display with timer indicator ensures ease of use. **Night mode** provides ultra-quiet operation and automatic display switch-off, meaning that the sea air simulator can be operated even while you sleep.

Usage

maremed®
Perfect for day
and night.

To use maremed®, place in your room of choice allowing 30cm clearance on all sides. There are 3 operation settings to choose from:

By the hour throughout the day – maremed® will naturally humidify your room without vapour formation of salt deposits. Perfect for your office or home living space.

During the night – let maremed® humidify the air in your bedroom for a healthier, more restful sleep.

24h operation – our most recommended setting for healthier air throughout your home, day and night.

Sea air at home: the innovative system technology

maremed® MK 500 - Sea air simulator

- Extremely fine nebulisation of sea salt particles in the ambient air
- LCD display with modern touch-key operation
- 3 fan levels
- Suitable for rooms up to 50 m²
- Night mode
- Water tank size: 6l
- Easy-to-clean design
- UVC light and filter change display
- Includes 625 g bottle of special sea salt, measuring jug, 2x pre-filters*, 1x water filter*
- Item no. 681.19

maremed® MK 500 - Special sea salt

- 1,250 g bottle of special sea salt
- For use with maremed® MK 500
- For 45 days in 24-hours operation
- Produced from natural salts
- Contains more than 65 trace elements
- Includes measuring jug for improved dosing
- Item no. 681.23

maremed® MK 500 Pre-filter and water filter

- 2x pre-filters*
- 1x water filter*
- For use with maremed® MK 500
- Item no. 681.22

maremed® MK 500 - Combination replacement set

- 90-day complete package (assuming 24-hour use every day)
- For use with maremed® MK 500
- A 1,250 g bottle of special sea salt. Includes measuring jug, 4x pre-filters*, and 2x water filters* are included
- Item no. 681.21

*Recommended for replacement every 3 months

The patented technology that creates a nature-identical seaside climate.
